**And Watch The  
Feathers Fly!!!**  
Made In the USA

Hunting waterfowl is a lot of fun; cleaning waterfowl isn't. When all is said and done, the skin of the bird is often torn apart which can result in poor quality table fare.

The Lucky Plucker makes plucking waterfowl quick and easy. Simply insert the Lucky Plucker into a drill and let the rubber fingers go to work. The flexible rubber fingers on the Lucky Plucker quickly remove the feathers from the bird, while leaving the skin in tact. Whether one bird or a dozen need to be plucked, with the Lucky Plucker the birds will be ready for the freezer or the pot in no time!

With the Lucky Plucker, you can spend more time hunting waterfowl and less time cleaning them.
